

# Avira Security Management Center

Control all Avira security components centrally and efficiently

Avira Security Management Center (SMC) allows you to manage your Avira Security Solutions from any PC – throughout the network, whether you have 2 or 20,000 computers connected. Award-winning Avira virus protection was never so easy, efficient and cost-efficient to manage.

## Trouble-free, cost-efficient administration

- Simple creation of the security environment by drag and drop, computer lists or ADS/LDAP import
- Free definition of hierarchical groups to map organizational units
- Central installation of all supported Avira products from the SMC software repository
- Rapid configuration of computers or groups of computers by “bequeathing” properties and configurations (e.g. scope of search)
- Central password protection for configurations
- Scheduler for individual scheduling of routine tasks (at intervals ranging from once to monthly) Saving and automatic running of tasks for computers that are offline
- Automatic synchronization of the security environment with ADS or LDAP
- Automatic installation of an Avira product on every computer added to the security environment in line with security directive
- Automatic grouping of new computers based on IP addresses
- The synchronization of the SMC security solution with an Active Directory can be automated and implemented at regular intervals.
- Automatic filtering and display of computers from the security environment that do not comply with the security directives.
- Integrated Internet Update Manager for uniform, central updating of all SMC components and Avira program packages and for local mirroring of product and security updates. It is possible to create several update servers that can be assigned to individual groups.
- Automatic updating of Avira AntiVir Professional
- Test mode for mirrored updates. Separate updates also via commands or task schedulers
- Support for computers with dynamically allocated IP addresses DHCP)
- “Silent setup” of SMC agents in the network

## High transparency of all processes, more information and greater security

- Event manager to monitor the current system security directly. Event filtering by various criteria
- Alert management with freely definable rules for individual notification
- Monitoring of product and module status for administered products
- User management incl. password or general or group-based privilege allocation
- Security-related reporting with defined templates to create individual reports
- SSL encrypted connections between the SMC and the administered computers
- To ensure even more secure communication between the SMC and the installed agents, the new version also allows separate SSL certificates to be produced and used in the system.
- Possibility to formulate/implement internal security directives
- Optional SSH public key authentication during agent installation
- Mutual authentication of the components SMC server, frontend and agent

## System requirements

<b>SMC Server:</b>	<ul style="list-style-type: none"> <li>• Windows Server 2003 SP1</li> <li>• Windows Server 2003 x64 Edition</li> <li>• Windows Server 2008 [x32 or x64]</li> </ul>	<b>SMC Agent:</b>	<ul style="list-style-type: none"> <li>• Windows XP [x32 or x64]</li> <li>• Windows Server 2003 [x32 or x64] SP1</li> <li>• Windows Vista [x32 or x64]</li> <li>• Windows 7</li> <li>• Windows Server 2008 [x32 or x64]</li> <li>• Linux [glibc 2.2]</li> <li>• Sun Solaris SPARC 9 and 10</li> </ul>
<b>SMC Frontend:</b>	<ul style="list-style-type: none"> <li>• Windows XP [x32 or x64]</li> <li>• Windows Vista [x32 or x64]</li> <li>• Windows 7</li> <li>• Windows Server 2003 [x32 or x64] SP1</li> <li>• Windows Server 2008 [x32 or x64]</li> </ul>		

**Note:** Information regarding the lifecycle of the Avira products and a corresponding overview can be obtained from: [http://www.avira.com/en/support/product\\_lifecycle.html](http://www.avira.com/en/support/product_lifecycle.html)

**Licensing:** One license for all supported platforms; licensing per PC; periods: 1 year or 3 years; licenses can be extended at a 30 percent saving.

**Scope of license:** Free updates and upgrades during the licensing period; 14-day free installation/configuration support (telephone/email); free change of platform, software and documentation downloads.
