

## Avira and Berrio-Otxoa: A Bright, Secure Future Through Education

**Founded in 1903 in Bilbao, Spain (Basque Country), Berrio-Otxoa Ikastetxea is a school with a long-standing tradition of educational excellence. In 1968, Berrio-Otxoa Ikastetxea moved to a large building in order to accommodate new technologies for years to come.**

With more than 2,000 students and an innovative approach to education, graduates of Berrio-Otxoa are poised for a successful future marked by positive contributions to the world around them. A commitment to realizing every person's potential is reflected in the choice of Avira as the school's antivirus solution. The people of Berrio-Otxoa constantly strive to adopt the latest methodological advances powered by talented people.

In order to maintain their high educa-

tional standards, Berrio-Otxoa has made an investment in alternative education strengthened by a commitment to coordination and teamwork. The school aims to make teaching and learning active and participatory through methodology that continues to evolve over time.

Based on this philosophy, Aitor Meaza manager the I.T. department at Berrio-Otxoa, chose an Avira security solution after weighing all the options. He explains:

"As the manager of a computer center with

## Avira Success Story

more than 400 workstations, I needed to find a reliable antivirus. The first computers sent by Eskola 2.0 had already incorporated Avira. From there, I started doing some online research, and in most of the tests I found that Avira is among

the top five antivirus vendors in terms of detection rate, light software weight, and so on. After asking for a price quote, the educational discount was too good to pass up, so I decided to go forward with this excellent solution.”
