CENFARTE distributes medical devices and beauty products to retail pharmacies, and provides all logistics-related services to the pharmaceutical industry.

CENFARTE was founded in 1942 by a group of pharmacists who were intimately aware of the daily challenges within their field.

Wishing to solve the supply problems prevalent within back-office operations of pharmacies, they set about leveraging the best resources available while implementing strong economic and financial management practices.

Notable milestones in CENFARTE's history include the opening in 1975 of a store in Santander, which accommodates ultra-

modern facilities, and the 1978 corporate expansion into Castile and Leon, which laid the grounds for the subsequent acquisition of the Pharmaceutical Stock Center in the city of Palencia.

Constantly attentive to the latest technological developments, CENFARTE proceeded in 1984 to computerize its systems. As a consequence, it re-organized and stored the available information in electronic format, thus achieving efficiency and productivity gains throughout its business operations. Building on

these initial successes, CENFARTE installed in 1987 the first automatic dispenser, which facilitated the consolidation of its geographic expansion, which had begun a decade earlier: Asturias in 1988 and Vizcaya in 1995. With the objective of improving the level of healthcare on offer, two stores were opened in both provinces. The geographical approach adopted vis-à-vis retail pharmacies enables CENFARTE to deliver excellent quality service at the lowest possible cost, which is and remains its top priority.

One of the major concerns for CENFARTE is security. Given the complexity of CEN-

FARTE's IT infrastructure, the challenges relating to maintaining the geographical spread between its facilities while assuring a critical connection with the headquarters in Santander (Cantabria, Spain), CENFARTE required a truly comprehensive and sophisticated IT-security solution. Avira's offer was selected among many as constituting the best choice.

Nowadays, CENFARTE has a Stock Center in Cantabria, Basque Country, Asturias, Palencia and Madrid.
