

# Avira

Avira Antivirus Security  
(Version 3.4)

## Changelog

---

## 1. General Information

Avira Antivirus Security Version 3.4 will be released to Google Play on 27 May 2014. Avira will continue to provide only one single Avira Security app in Google Play called “Avira Antivirus Security”. With this version the Premium features can be unlocked within the App via an Upgrade Button.

On the Avira website, and for all communications, the premium Android product will be referred to as “Avira Antivirus Security Pro”.

---

## 2. New Features and Bug fixes

The changes or enhancements are:

- Google Analytics Campaign Tracking to track user’s installation from various campaigns
- Upgrade button to allow to upgrad to the premium version within the app
- Added Identity Safeguard ‘Recent Breaches’ and ‘Information’ page
- General User Interface improvements
- Fixed an issue where Secure Browsing does not work on Android default browser after certain system updates by Samsung

---

## 3. System Requirements

### 3.1 Supported Manufacturers

- LG
- Samsung
- HTC
- Motorola
- Google Nexus
- Sony

### 3.2 Supported Android Versions

- Android 2.2, Froyo
- Android 2.3.x, Gingerbread
- Android 4.0.x, Ice Cream Sandwich
- Android 4.1.x, Jelly Bean
- Android 4.2, Jelly Bean

- Android 4.3, Jelly Bean
- Android 4.4, KitKat

Smartphones running at least Android 2.2, will be able to install and run the app. Avira Antivirus Security will support tablets running at least on Android version 4.0.

### 3.3 Tested Devices

- Google Nexus 7
- Samsung Galaxy Tab 27.0
- Motorola Xoom
- LG Nexus 4
- LG Nexus 5
- Samsung Note 3
- Samsung Galaxy S4
- Samsung Galaxy S3
- Samsung Galaxy S2
- HTC Sensation XE
- Motorola Milestone
- Sony Xperia Arc S

### 3.4 Supported Screen Sizes

- Normal screens, low-extra high DPI\*
- Large screens, low-extra high DPI
- Extra-large screens, low-extra high DPI

\* **Dots per inch (DPI)** is a measure of spatial printing or video dot density, in particular the number of individual dots that can be placed in a line within the span of 1 inch (2.54 cm). The DPI value tends to correlate with image resolution, but is related only indirectly.

---

## 4. Supported Languages

The release of Version 3.3 will support the languages:

- English
- German
- French
- Italian
- Spanish
- Japanese
- Korean
- Brazilian Portugese (new!)

---

## 5. Install / Uninstall

Avira Antivirus Security is available for download via the Google Play Store only. To uninstall Avira Antivirus Security, the user needs to make sure that the 'device administration' setting is deactivated. Avira Antivirus Security can then be uninstalled via the Android application manager on the device, just like any other application. Another way to uninstall Avira Antivirus Security is to use the built-in Uninstallation Wizard, available in the Help section of the app.

---

## 6. Update

Existing users will get an update notification directly from the Google Play Store, as it is the case with other apps. The update will be performed once the user is tapping on **Update**.

---

## 7. License

Avira Antivirus Security 3.4 is embedded with premium features. The premium features can be enabled when a user has purchased and activated the license in the „My Account“ of Avira Online Essentials.

---

## 9. Number of Users/Devices & Runtime

Every license is valid for 1 user for up to 5 devices. For free users there is no run time. For Pro users the runtime is for 1 year and the licence is valid for up to 2 devices.

---

## 8. Help Resources

The user is able to access information about the product from the following places:

- **FAQ**  
Knowledge Base articles about Avira Antivirus Security are available [online](#)
- **Community Forum**  
[Avira Answers](#) is an online support community where users can exchange information with each other
