

Avira Antivirus Security (Version 3.1 SP1)

Changelogs

1. General Information

Avira Antivirus Security Version 3.1 SP1 will be released to Google Play on 11th February 2014.

2. Highlights

This release supports Android KitKat 4.4. In addition, this release extends antivirus mobile engine's license validity, improves mobile search engine optimization (SEO) and provides a link to Avira Answers.

3. System Requirements

3.1 Supported Manufacturers

- LG
- Samsung
- HTC
- Motorola
- Google Nexus
- Sony

3.2 Supported Android Versions

- Android 2.2, Froyo
- Android 2.3.x, Gingerbread
- Android 4.0.x, Ice Cream Sandwich
- Android 4.1.x, Jelly Bean
- Android 4.2, Jelly Bean
- Android 4.3, Jelly Bean
- Android 4.4, KitKat

However, any smartphone running at least Android 2.2 will be able to install and run the app. Avira Antivirus Security will support tablets running at least on Android version 4.0.

3.3 Tested Devices

- Google Nexus 7
- Samsung Galaxy Tab 27.0
- Motorola Xoom

- LG Nexus 4
- Samsung Note 3
- Samsung Galaxy S2
- Samsung Galaxy S3
- Samsung Galaxy S4
- HTC Sensation XE
- Motorola Milestone
- Sony Xperia Arc S

3.4 Supported Screen Sizes

- Normal screens, low-extra high DPI*
- Large screens, low-extra high DPI
- Extra-large screens, low-extra high DPI

4. Supported Languages

The release of Version 3.1 will support the languages:

- English
- German
- French
- Italian
- Spanish
- Japanese
- Korean

5. New Features

The new features and enhancements are:

- Android Kitkat 4.4 support
- In order to improve mobile SEO in Play store, the app name is changed to "Avira Antivirus Security"
- The current MAVAPI license will expire in June 2014, this release extends antivirus engine license validity
- Link to Avira Answers for online support
- Fixed an issue where the blocked calls/SMS notification popup could not be viewed on Android 4.4

^{*} The acronym DPI stands for the term "Dots Per Inch". The dot density in the image display is a measure of the detailed rasterized visual display, and thus a quality aspect of the technical reproduction.

6. Install / Uninstall

Avira Antivirus Security is available for download via the Google Play Store only. To uninstall Avira Antivirus Security, the user needs to make sure that the 'device administration' setting is deactivated. Thereafter, Avira Antivirus Security can be uninstalled via the Android application manager on the device, just like any other application. Another way to uninstall Avira Antivirus Security is to use the built-in Uninstallation Wizard, available in the **Help** section of the app.

7. Update

Existing users will get an update notification directly from the Google play store, as is the case with other apps. The update will be performed once the user is tapping on **Update**.

8. License

Avira Antivirus Security 3.1 is embedded with premium features. The premium features can be enabled when a user has purchased and activated the license in Avira Online Essentials.

9. Help Resources

The user is able to access information about the product from the following places:

• FAQ
Knowledge Base articles about Avira Free Android Security are available online.
