

Avira

Avira Version 2014
(Update 4)

Changelogs

Avira

General information

Avira Version 2014, Update 4 will contain the following changes:

1. New Features

- False Positive prevention for Real-time scanning
- Implemented enhancements to the updater
- Japanese URLs have been set up for the Online Shop

2. Bug fixes

- IPM „Server busy“ message popups fixed
- Added automatic clean-up of old *scaninfoXXX.tmp* files during startup to prevent filling up the whole disk

Note

Update 4 will be released for Workstation products only! Under certain circumstances the update requires a reboot.
