

# Avira

Avira Antivirus Pro  
(Update 5)

## Changelog

---

## General information

Starting with this update, there is going to be only one single paid product, called Avira Antivirus Pro. It replaces all existing Antivirus Components from the following product suites:

- Avira Antivirus Suite
- Avira Internet Security Suite
- Avira Family Protection Suite
- Avira Ultimate Protection Suite

### Note

A reboot of the system might be necessary due to some driver issues.

---

## 1. New Features

- **Refreshed GUI**  
A fresh look of the product, applying the latest corporate identity graphics.
- **New AIRS (Avira Intelligent Repair System) functionality**  
The latest repair functions are updated (reboot handling, quarantine handling, extended API).
- **The toolbar will not be offered anymore in all products**  
From now on, all products will be delivered without the SearchFree toolbar.

---

## 2. Bug fixes

- **System Tray application improvements**  
Fixed various bugs, reduced the amount of events written which might have slowed down the computer
- **Improvements in Web protection and network filtering**  
This update fixes various bugs and adds some performance improvements
