

# Avira

Avira Antivirus Security  
(Version 3.3)

## Changelogs

---

## 1. General Information

Avira Antivirus Security Version 3.3 will be released to Google Play on 7 May 2014. There will continue to only be one single Avira Security app available in Google Play Store. It will continue to be called “Avira Antivirus Security” in the Playstore. Premium features can be unlocked from inside this version of the app since Android 3.2.

On the Avira website, and for all communications, the premium Android product will be referred to as “Avira Antivirus Security Pro”.

---

## 2. Highlights

Version 3.3 contains 3 major changes:

- Identity Safeguard for all users. The user’s primary email (used for registration) as well as their address book emails will be scanned against the list of compromised emails available in our database
- Icons across the app are updated to the new iconography
- Brazilian Portugese language is added to the app

---

## 3. System Requirements

### 3.1 Supported Manufacturers

- LG
- Samsung
- HTC
- Motorola
- Google Nexus
- Sony

### 3.2 Supported Android Versions

- Android 2.2, Froyo
- Android 2.3.x, Gingerbread
- Android 4.0.x, Ice Cream Sandwich
- Android 4.1.x, Jelly Bean

- Android 4.2, Jelly Bean
- Android 4.3, Jelly Bean
- Android 4.4, KitKat

For smartphone running at least Android 2.2, will be able to install and run the app. Avira Antivirus Security will support tablet running at least on Android version 4.0.

### 3.3 Tested Devices

- Google Nexus 7
- Samsung Galaxy Tab 27.0
- Motorola Xoom
- LG Nexus 4
- LG Nexus 5
- Samsung Note 3
- Samsung Galaxy S4
- Samsung Galaxy S3
- Samsung Galaxy S2
- HTC Sensation XE
- Motorola Milestone
- Sony Xperia Arc S

### 3.4 Supported Screen Sizes

- Normal screens, low-extra high DPI\*
- Large screens, low-extra high DPI
- Extra-large screens, low-extra high DPI

\* **Dots per inch (DPI)** is a measure of spatial printing or video dot density, in particular the number of individual dots that can be placed in a line within the span of 1 inch (2.54 cm). The DPI value tends to correlate with image resolution, but is related only indirectly.

---

## 4. Supported Languages

The release of Version 3.3 will support the languages:

- English
- German
- French
- Italian
- Spanish
- Japanese
- Korean
- Brazilian Portugese (new!)

---

## 5. New Features

The changes or enhancements are:

- New Identity Safeguard feature to scan emails to see if they were compromised in any security breaches
- Portuguese-Brazilian language support
- GUI enhancements (new icons, etc.)
- Language fixes

---

## 6. Install / Uninstall

Avira Antivirus Security is available for download via the Google Play Store only. To uninstall Avira Free Android Security, the user needs to make sure that the 'device administration' setting is deactivated. Avira Antivirus Security can then be uninstalled via the Android application manager on the device, just like any other application. Another way to uninstall Avira Free Android Security is to use the built-in Uninstallation Wizard, available in the Help section of the app.

---

## 7. Update

Existing users will get an update notification directly from the Google play store, as is the case with other apps. The update will be performed once the user is tapping on **Update**.

---

## 8. License

Avira Antivirus Security 3.3 is embedded with premium features. The premium features can be enabled when a user has purchased and activated the license in the „My Account“ of Avira Online Essentials.

---

## 9. Number of Users/Devices & Runtime

Every license is valid for 1 user for up to 5 devices. For free users there is no run time. For Pro users the runtime is for 1 year and the licence is valid for up to 2 devices.

## 9. Help Resources

The user is able to access information about the product from the following places:

- **FAQ**  
Knowledge Base articles about Avira Antivirus Security are available [online](#)
- **Community Forum**  
[Avira Answers](#) is an online support community where users can exchange information with each other
