

Avira System Speedup is a new PC optimization and error repair utility that improves the performance of your PC.

Regularly cleaning your computer could save you costly maintenance fees.

It is common to fill space on a PC's hard drive with games, productivity programs or files, such as music, digital photos, video clips and other Internet files.

Avira System Speedup is the utility you need to safely and easily remove old or unused programs and files from your Windows-based computer.

System Requirements

- Windows® XP, 32 bit
- Windows® Vista, 32 bit or 64 bit
- Windows® 7, 32 bit or 64 bit
- 300MHz or higher processor
- 256 MB RAM
- 12 MB free hard disk space
- Internet access is required to download product updates

Functions

Several tools are integrated into Avira System Speedup:

1. Clean Up Utilities
2. System Optimization Utilities
3. Tuneup Utilities
4. Other tools

1. Clean Up Utilities

- **Junk File Cleaner**
Removes junk files and recovers disk space
